**Key words.** Coleoptera, Heteroceridae, *Augyles*, *Heterocerus*, *Micilus*, new records, Bhutan

### Introduction

The heterocerid fauna from Bhutan is very poorly known. Only SKALICKÝ (2008) reported three species of Heteroceridae for Bhutan: *Augyles laticollis* (Maminza, 1933), *A. schmidtjaegeri* Mascagni, 1998, *A. terzanii* (Mascagni, 1995) and one species: *A. marshalli* (Maminza, 1928) as uncertain. New distribution records of six species of Heteroceridae for Bhutan are provided herein.
